1. Interface Overview (Figure 1)

1. Current Status
2. By County and City
3. Events List
4. Home
5. History
6. Personnel List
7. User Profile

2. Function Overview

A. Home

- **Current Status:** This function displays all current Event lists.
- **Events List:** Select an event to access the Event Handling Page.

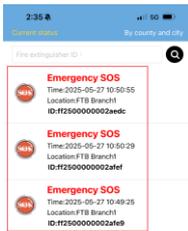

Figure 2

- **Event Handling Page:**

Figure 3

- **Send:** For on-site repairs, fill in repair notes and upload photos, then submit. Once submitted, the record can be viewed and closed in the History section.

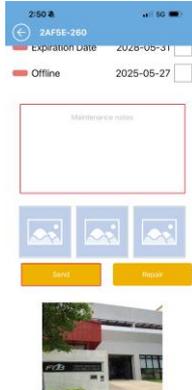

Figure 4

- **View Floor Plan:** Click to change the fire extinguisher location.

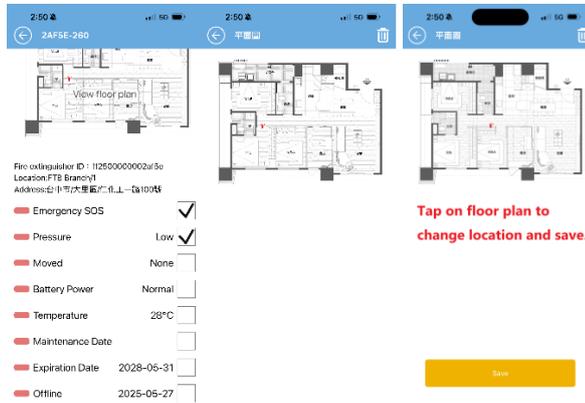

Figure 5

- **Maintenance Notes (Figure 4):** Enter details of the event handling.
- **Select Photo:** Upload photos from the gallery or take them on-site.

Figure 6

- **Repair:** If the fire extinguisher cannot be repaired on-site and must be taken off-site, click “**Repair.**” The event will remain on the Events List of the Home page and be marked as (**Repairing** in red, See Figure 8 below).

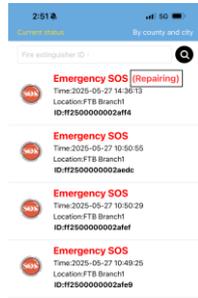

Figure 7

- **Repair Completion:** Follow the steps in Event Handling Page to complete the normal on-site repairs process.

- **By County and City:** Displays the total number and locations of fire extinguishers in county, city, or building.

Figure 8

- **Select Building:** Choose a building to view the number and locations of fire extinguishers.

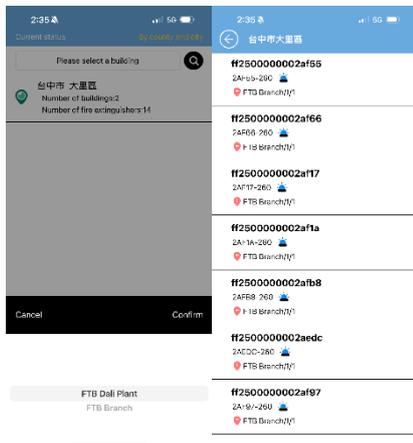

Figure 9

- Click on a fire extinguisher to view detailed information.

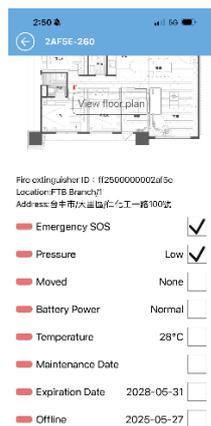

Figure 10

- **By Area:** View the total number and locations of fire extinguishers across counties and, or cities.

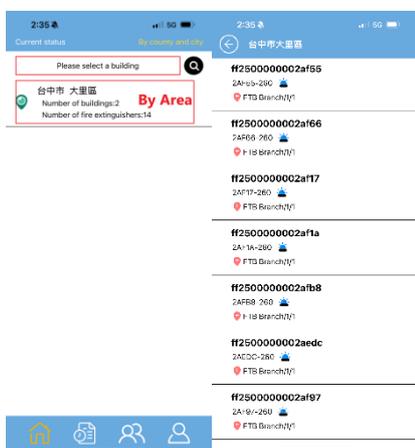

Figure 11

- Click on a fire extinguisher to view detailed information.

Figure 12

B. History: Records can be closed directly or await backend confirmation for closure (See **Figure 13** to close the case). Before closure, records appear normal (See **Figure 14**) in the History section; after closure, the text color of the records becomes faded (See **Figure 15**). Unnecessary records can be deleted by the backend.

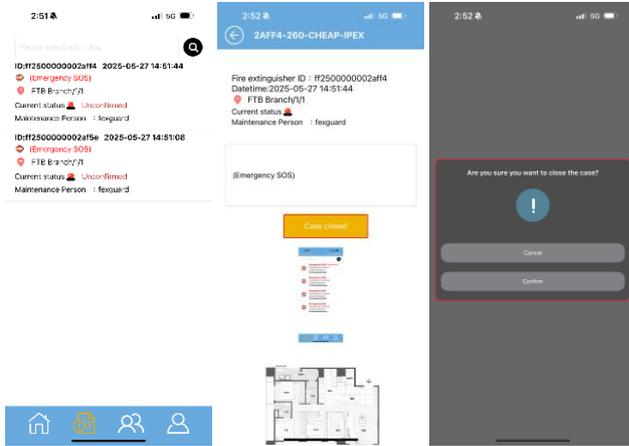

Figure 13

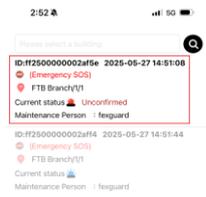

Figure 14

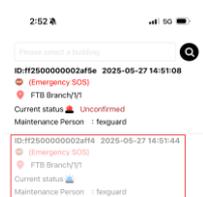

Figure 15

C. Personnel List: Lists all registered backend personnel, with the option to call them directly.

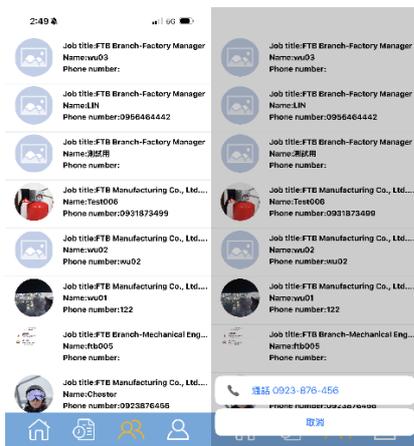

Figure 16

D. User Profile:

- **Administrator (Figure 17):** Includes backend management options for immediate event handling.
- **Maintenance Personnel:** Can handle events on FeXGuard and modify user profile information.
- **General User:** Can only view and receive event notifications, unable to handle events, but can modify user profile information.
- **Guest:** Can only view and receive event notifications, unable to handle events, but can modify user profile information.
