

Mission Statement

Providing and manufacturing high quality products for our customers and helping our customers solve their technical issues in any possible ways.

Company Profile

Formosa Thermometer & Barometer Mfg. Co.,Ltd.,FTB founded in 1985 is a company mainly manufacturing high quality,accuracy,and precision liquid-filled pressure gauges, ABS pressure gauges,all stainless steel pressure gauges, and electric contact pressure gauges.

Founded in 1985, with a 13-year-experience in the field of Hydraulics and Pneumatics along with the awareness of quality improvement, we indeed looked for technical cooperation with Wiebrock Messund Regeltechnik GmbH,a specialized contact device manufacturer in Germany, to cope with managing new techniques and quality systems for the main frame of ISO 9002. By doing so, our products have passed several examinations executed through **Industrial Technology Research Institute** of Taiwan (ITRI)in accordance with the standards of **JIS B 7505-1994(Japanese Industrial Standards)**,clauses 9.4to 9.7 with an outcome of 1.5%F.S. accuracy. The report includes the tests of repeatability, one-million-time durability, static pressure and dynamic pressure, and our products, which were examined through ITRI, can be traced back to the standards of CNLA, Chinese National Laboratory Accreditation,as well. In addition, we received the **Award of Symbol of Excellence Winner '97** sponsored by Department of Economic Affairs of Taiwan on our pressure gauges in 1997.

Our creeds in quality management, operations management and post-sale services are sincerity in quality control, earnest in process control,and responsibility in customer satisfaction.

"Strive for Perfection" is our quality policy, which can be explained in three ways — product quality,service quality, and production quality. The optimal purpose for our quality policy is to satisfy the needs of our customers.

For more information on-line; please check out our web site on the World Wide Web of the Internet at the address of **<http://www.ftb.com.tw>**; you are welcome to browse and contribute your comments to our home page at any time. Thus,we are looking forward to serving your esteemed company in the very near future.

Equipment Profile

Dead Weight Testers Installed with 0.2%F.S. Test Gauges
Hydraulic & Pneumatic Pressure Testers Installed with 0.6%F.S. Test Gauges
Vacuum Pressure Testing Machines
Connection Setting Machines
Hydraulic & Pneumatic Pressure Leaking Testers
Automatic Liquid-Filling Machines
Automatic Bezel Sealing Machines
High Frequency Welding & Soldering Machines
Ultrasonic Plastic Welding Machines
Repeated Testing Machines
